

THILAK RAJKUMAR

SOC Analyst | Blue Team Security | Threat Detection | EDR / XDR
Chennai, India | 7305756246 | rthilakhari@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cybersecurity graduate with hands-on SOC operations experience through a self-built enterprise-grade virtual SOC lab and a current network support internship at EC Group. Experienced in 24x7 alert monitoring, log analysis, incident triage, EDR/XDR monitoring, and threat detection mapped to the MITRE ATT&CK framework. Skilled in Splunk SIEM for log ingestion, correlation, and SOC dashboard development. Familiar with ISO 27001 and OWASP security frameworks. Seeking an entry-level SOC Analyst or Security Intern role to contribute to security operations and incident response in a 24x7 environment.

INTERNSHIP EXPERIENCE

Network Support Intern

Present

EC Group, Chennai

- Assisted in troubleshooting network connectivity issues using basic diagnostic tools including ping, traceroute, and ipconfig/ifconfig
- Supported configuration and maintenance tasks for routers and switches in a live office network environment
- Monitored network traffic independently using Wireshark to observe packet flow, identify anomalies, and develop practical protocol analysis skills
- Assisted in firewall rule review and basic VPN connectivity troubleshooting to support daily network operations
- Gained hands-on exposure to real-world network infrastructure and enterprise IT support workflows

TECHNICAL SKILLS

SIEM & Detection: Splunk (Log Ingestion, SPL Queries, Dashboards), Wazuh SIEM, EVE JSON Log Analysis, Alert Triage, Incident Reporting, EDR Monitoring, XDR Concepts, 24x7 Monitoring

Security Concepts: Threat Detection, Log Analysis, Incident Response, Vulnerability Assessment, Threat Monitoring, Network Security, Endpoint Security, Detection Engineering

Frameworks: MITRE ATT&CK, ISO 27001 (Awareness), OWASP Top 10, Security Risk Register

Attack Simulation: Nmap, Kali Linux, Metasploit Framework, Wireshark

Operating Systems: Linux (Ubuntu, Kali), Windows

Networking: TCP/IP, Firewall Configuration, VLAN Segmentation, pfSense, Routing & Switching

Programming: Python, C, C++, SQL, Bash

Other Tools: Docker, VMware Workstation, Git, VirusTotal API, ClamAV, Sysmon, QRadar (Familiar)

PROJECTS

SOC Homelab — Blue Team Security Lab

2025 – Present

Designed and deployed a segmented enterprise-grade SOC lab integrating Wazuh EDR, Splunk SIEM, Suricata IDS, Sysmon telemetry, and pfSense firewall for centralized threat detection, attack simulation, and incident investigation.

- Built a segmented virtual network using pfSense firewall across Management, Internal LAN, and DMZ zones with enforced inter-zone traffic policies
- Deployed Wazuh agents on Windows endpoints as EDR — collecting Sysmon telemetry, Security Event logs, and file integrity alerts for host-level detection
- Analyzed multiple log source types across the environment to detect and investigate threats:
 - Sysmon Logs — process creation, PowerShell execution, parent-child relationships, registry modifications
 - Windows Security Event Logs — authentication failures, privilege escalation, account activity
 - Firewall Logs — pfSense allow/deny events, outbound traffic, DNS requests, NAT translations
 - Network IDS Alerts — Suricata eve.json detections for scanning, brute force, protocol anomalies
- Deployed Splunk as the centralized SIEM — ingesting Wazuh alerts, Suricata eve.json, and pfSense syslog into separate indexes (wazuh, suricata, pfsense) for unified correlation
- Built Splunk SPL queries and SOC dashboards covering alert severity distribution, top attacker IPs, PowerShell activity, and failed login trends
- Correlated endpoint EDR telemetry from Wazuh with network IDS alerts from Suricata in Splunk to simulate XDR-style cross-layer attack chain investigation

- Simulated attacks from Kali Linux (port scanning, brute force, reverse shell) and validated detection across Suricata, Wazuh, and Splunk end-to-end
- Mapped all detections to MITRE ATT&CK techniques including T1059 (PowerShell), T1110 (Brute Force), T1046 (Network Scanning), and T1547 (Persistence)

Technologies: *pfSense, Wazuh EDR, Splunk SIEM, Suricata IDS, Sysmon, Kali Linux, VMware Workstation, MITRE ATT&CK*

CYBERSENTINEL — SSH Honeypot Attack Analysis

2024 – 2025

- Deployed a low-interaction SSH honeypot to capture brute-force login attempts and attacker command sequences
- Extracted behavioral features from captured sessions and trained a Random Forest classifier to detect and classify attack patterns
- Analyzed attacker TTPs to build threat intelligence profiles for improving detection rules
- Visualized attack patterns including IP frequency, login attempt rates, and command usage trends to identify attacker behavior

Technologies: *Python, Machine Learning, Random Forest, SSH Honeypot*

Malware Scanning Tool

2024

- Built a file and URL scanning application integrating VirusTotal API and ClamAV antivirus engine
- Automated scan result analysis via Python scripts to flag malicious indicators
- Demonstrated a complete malware detection pipeline from input to verdict

Technologies: *Python, VirusTotal API, ClamAV*

Offensive-Defensive Security Analysis — Command & Control Study

2023 – 2024

- Developed a controlled simulation of command & control techniques including remote command execution and file transfer to study attacker behavior
- Analyzed corresponding defensive detection methods and EDR evasion indicators to inform blue team rule development

Technologies: *Python, Networking, Socket Programming*

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Google
- IBM Hands-on Introduction to Linux Commands and Shell Scripting — IBM
- CompTIA Security+ — CompTIA (*In Progress — Expected Q3 2026*)
- SOC Analyst Learning Path — LetsDefend (*In Progress — 2026*)
- ISC2 Certified in Cybersecurity (CC) — ISC2 (*In Progress — 2026*)
- SQL Basic — HackerRank

EDUCATION

B.Tech — Computer Science and Engineering (Cybersecurity Specialization)

Graduated: August 2025

SRM Institute of Science and Technology, Chennai | CGPA: 8.64 / 10
